Care and use of the Gigs

1. Gigs should be lifted by the gunnels and not dragged down the beach.
2. You should never step into a gig unless it is properly afloat as this can damage it.
3. Please approach the beach slowly because hitting the beach at speed can damage the gigs.
4. Pins should be removed on the beach and when pulling the gigs up the beach, you should hold onto the gunnels and never push on a pin.
5. The gig should be hosed down with fresh water and sponged out before being put away.
6. When putting the gigs away, the boat should be lifted onto the ground, supports should be slid in under the bow and stern and a trig should be slid under each side so that the gig is even keel.
7. Please check seat pillars are in place before sitting down. These should not be removed to fit stretchers.
